CATALOGO PARTI DI RICAMBIO • SPARE PARTS CATALOGUE • CATALOGUE PIECES  
DE RECHANGE • ERSATZTEIL-KATALOG • CATALOGO DE LOS REPUESTOS

## INSTRUCTIONS FOR USING THE CATALOGUE

The illustrated tables show the detached parts and the manner in which these are to be assembled.

The drawings surrounded by short dashed lines illustrate parts which are no longer produced but which can still be supplied.

One or more pages correspond to every table of drawings. In these pages there are four columns which give the following information:

First column : indicates the reference numbers of parts or groups of parts shown in the table.

Second column: indicates the symbols of the parts or groups of parts, which symbols are always to be wholly mentioned in your orders.

Third column : indicates the serial number of the first machine in which the particular part was first assembled. If no serial number is shown, the part concerned has never been modified. When are given two serial numbers separated by the sign +, this means that the assembly of the part concerned was begun with the machine corresponding to the first serial number and was ended with the machine corresponding to the second serial number. When, on the other hand, beside the reference number there are more symbols united by a brace, it is necessary, for the field of serial numbers indicated, to replace, in addition to the part shown in the figure, also the other parts corresponding to the symbols in the brace.

Fourth column: this column is left empty for the use of our Sales Organizations to indicate the shelf or drawer number where the particular part is stored, in order to be able to find it immediately when required.

*REMARKS: The machine class 720-100 (ex RZ1) is illustrated in the first part of this catalogue. The following parts show the class 721-100 (ex RZ1 39) and the sub-classes in which appear only the particular parts which differ from those of the 720-100 machine. The numeration of the machines RZ1 and RZ1 39 began with the serial number 50-0000001 and went on in one series only to the serial number 50-0014057. At this point the numerical classification was adopted and serial numbering continued as follows:*

720-0015001

*-All future modifications will be communicated periodically by means of Technical Bulletins together with relative instructions.*

#### Example:

You want to order part No. 17 of table 3357 (pressure regulating knob) for the machine with the serial number 50-0008657. Consulting No. 17 on the reference page, you will find that the correct symbol number (or order number) is

95322 2 00

as the serial number of the machine is comprised between 50-0000001 and 50-0011613.

If, on the other hand, you want the same part for the machine with serial number 720-0015234, the correct order number is

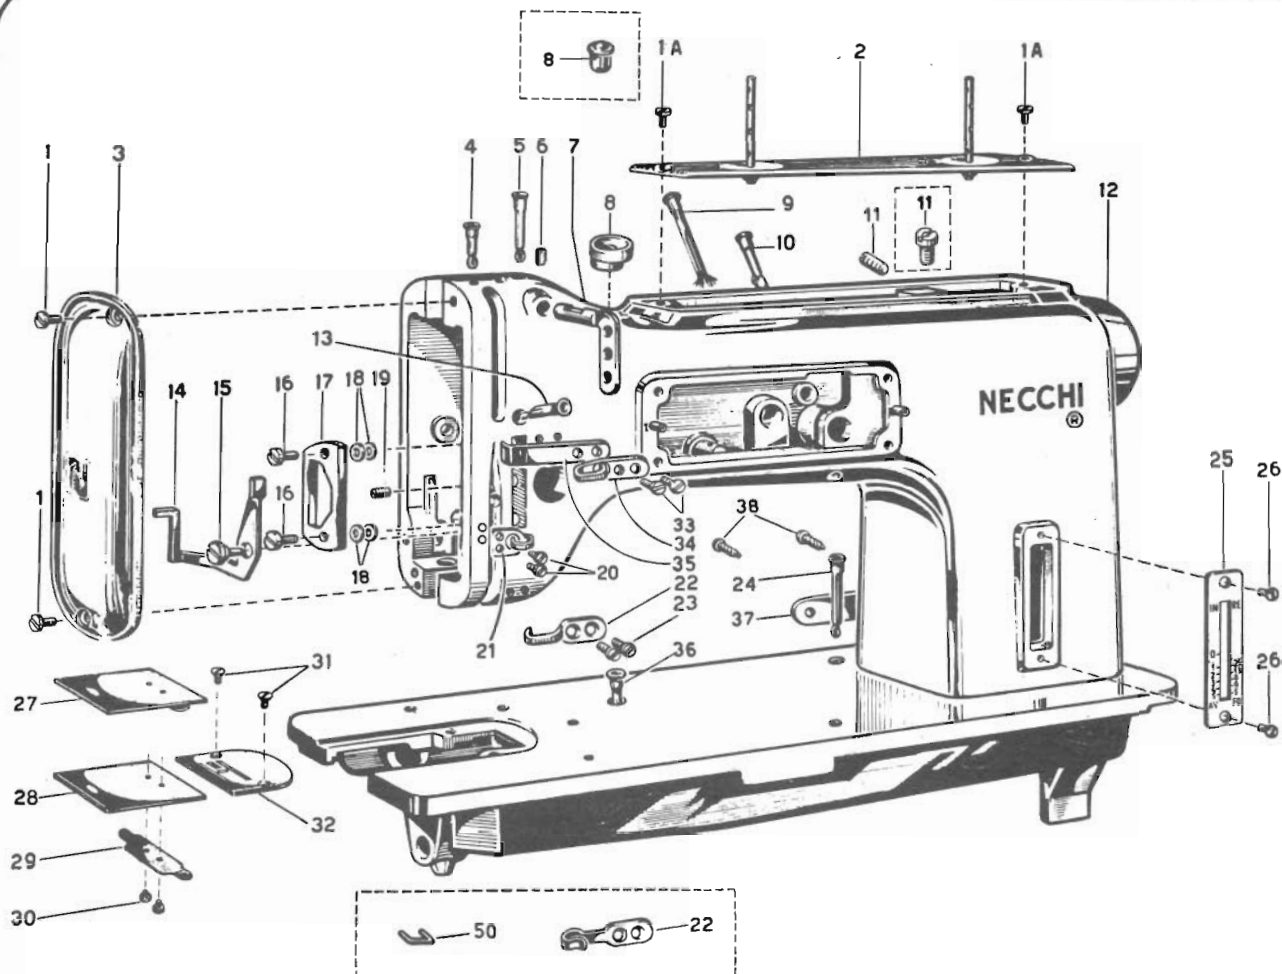

123408 2 00

IN ACCESSORIES AND SPARE PARTS ORDERS, ONLY THE SYMBOL NUMBERS CORRESPONDING TO THOSE LISTED IN THIS CATALOGUE WILL BE CONSIDERED VALID.
